Description :

Prsentation de l'diteurUpdated! (August 2014) Work Smarter, NOT Harder Learn the common traps waiting to snare you in pursuit of profitable niche websites. Who is this book for? Two types of people: First timers to the world of making money from a niche site (who want to learn from other people's mistakes in order to

save themselves hundreds of hours and actually be successful). Veterans who have tried to make money from a niche site but failed (to one extent or another) and want to better understand why they failed and avoid repeating the same mistakes again. Why do you need this book? Because you're wise and want to learn from my own and other people's mistakes. Because you don't want to fall into the same traps that thousands of others fall into every day. Because you want to create a successful niche site that generates significant passive income. Because creating a niche site that actually makes money is NOT easy - regardless of what other's may say. Because any niche website endeavor benefits from all the help it can get. What does this book offer? 14 simple rules that, if followed, nearly guarantee your success. My own personal story of how I failed BIG in attempts to create a niche site that, in the end, cost me time and money and generated virtually zero. HUNDREDS of hours of your life saved from being wasted, as you would have otherwise fallen into the same alluring traps that other niche-site newbies and veterans alike succumb to literally EVERY DAY.

Why so negative? This book is not negative, it's realistic. There are plenty of folks out there selling seemingly magic formulas that promise to make you thousands upon thousands if you only follow their seemingly simple and "fool-proof" advice. This isn't such a book. I didn't want to create another such book. I wanted to organize, articulate, and share the reasons that my own niche site failed. Why? First, for myself.

As I now enter into other niche-site endeavors I don't want to repeat my previous mistakes (ie: for organization and reference). Second, for you. Why do we all have to learn the hard way? We don't! Better to first learn the traps and mistakes, that way we can all avoid them and more easily and quickly reach success. If you've already begun doing anything related to a niche website (research counts) then stopping to read this valuable book really will save you countless hours. Most of these mistakes are incredibly easy to fall for. They're the main reasons that most niche sites are not profitable. If you want to work smarter than harder and create a profitable niche website, stop whatever work you've already begun...Presentation de l'diteurUpdated!
